FULL-STACK WEB DEVELOPER | MERN | LARAVEL | PHP

Results-driven developer creating robust, scalable web applications with measurable impact. Expert in modern JavaScript frameworks and PHP ecosystems, balancing technical excellence with user-centered design. Key achievements:

- Built college-wide feedback system serving 500+ users, increasing participation by 40% through intuitive design
- Developed event management platform handling 30+ events per semester, boosting student engagement by 25%.

Focused on high-performance web solutions that deliver business outcomes through technical innovation.

TECHNICAL SKILLS

Frontend Development:

- React.js, Redux, Flux, React Native, GSAP, Framer Motion
- JavaScript (ES6+)
- HTML5, CSS3
- Webpack, PWA Fundamentals

Backend Development:

- Node.js, Express.js, JWT
- Laravel, PHP
- MongoDB, MongoAtlas
- RESTful API development
- Authentication systems

Testing & Development Practices:

- Browser debugging tools
 - High level Design
 - Responsive design, Mobile first development
 - Sublime Merge
-

PROFESSIONAL EXPERIENCE

QaizenX

March 2025 - Present

Full stack development Intern

Collaborated on web applications across the development stack. Key contributions

- Built RESTful APIs using Laravel/PHP
 - Debugged and resolved critical code issues in production environments
 - Implemented frontend components with React.js
 - Connected frontend interfaces with backend services via API integration
 - Assisted with database operations in PostgreSQL
-

PROJECTS

SagarEvents - A Dynamic Event Management Website

- Developed a dynamic web application to manage all types of college events.
- Enabled event listings, registrations, scheduling, and real-time announcements.
- Used by 700+ students across fests, workshops, and cultural programs.
- Built with MERN stack for high performance and scalability.
- Deployed on Render with MongoDB Atlas for cloud-hosted database support.
- Praised for its smooth UX, responsive design, and reliable uptime during peak usage.

CampusInsights - Dynamic Student Feedback Platform for Campus Insights

- Developed of a secure, full-stack feedback system with Student, Admin, and Faculty panels.
- Built intuitive interfaces for feedback submission, management, and review.
- Used charts and visual reports for admin insights and decision-making. .
- Integrated Nodemailer for password recovery and secure authentication.
- Deployed on Render with MongoDB Atlas for cloud database support.
